DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 33-35 and 37-42 have been considered but are moot in view of the new ground(s) of rejection.

Response to Amendment

2. The examiner acknowledges the amendment filed on December 29th, 2008. The amendment comprises amending claim 33 and cancelling claims 1-32 and 36.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims **33, 34, 40 and 42** are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims **1, 4, 9 and 10** of U.S. Patent No. 6,981,543.

Art Unit: 3772

Although the conflicting claims are not identical, they are not patentably distinct from each other because the difference between claim 33 of the current application and claim 1 of the patent '543 lies in the fact that the patent claim includes many more elements and is this much more specific. Thus the invention of claim 1 is in effect a "species" of the "generic" invention of claim 33. It has been held that the generic invention is "anticipated" by the "species". *In re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993). Since claim 33 of the current application is anticipated by claim 1 of patent '543, it is not patentably distinct from claim 1 of patent '543. **As to claim 34 of the current application**, the limitations can be found in claim 4 of patent '543. **As to claim 40 of the current application**, the limitations can be found in claim 9 of patent '543. **As to claim 42 of the current application**, the limitations can be found in claim 10 of patent '943.

Allowable Subject Matter

5. Claims **35, 37-39 and 41** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not disclose at least one internal wall includes portions that are configured symmetrically so as to form a centrally-disposed condensing region connected to a first capillary channel disposed on a first side of the condensing region and a second capillary channel disposed on a second side of the condensing region opposite of the first side.
